PROFESSIONAL EXPERIENCE

React Native Developer

Krenai | Nov 2023 – Present

Eartht5r | Live

- Implemented the **Google Maps Geolocation api**, for live user path tracking for there challenges. Like – A challenge for 1km cycling.
- Utilized React Native to facilitate cross-platform compatibility, allowing seamless access for the live path tracking for both iOS and Android users with background tracking path tracking when the app is in background.

1PYQ | Live

- Implemented the **Google Firebase Realtime Database**, for live chat **discussion form** for asking the doubts from the 1PYQ Solvers.
- Added the **ChatGPT Api** for fetching the instant solution of a doubt by tagging the **ChatGPT Solvers** with the doubt in the **discussion form**.
- Incorporated real-time updates and notifications for new book added, doubt notification for discussion form, and important announcements.
- Implemented the **ChatGPT Assistant API**, for to create own assistant for asking doubts directly from the ChatGPT Assistant
- Built a comprehensive mock test feature, enabling users to attempt and review tests seamlessly.
